How to Plan for Mixer Blender Parts

**Motors**
Extra motors can prevent unnecessary emergency shutdowns and lost production.

**Agitators**
Custom fabricated, requiring longer lead time for assembly, welding, and finishing.

**Drive Shaft Seal**
Plan for 2 - 3 seals in your parts inventory, depending on usage.

**Cylinders**
Plan ahead with back ups of cylinders, they can be a long lead time part.

**Discharge Bearing**
Recommend 1 or 2 for back ups. If bearing is not a stock item, plan for additional lead time.

**Discharge Shaft Seal**
Plan for 2 - 4 seals in your parts inventory program, depending on usage.

**Cover Gasket**
Gasket material for covers are sold by the foot.

**Safety Switches**
Inventory extra safety switches to reduce down-time.

**Seal Housing Gasket**
Keep 2 - 3 seals in your parts inventory, comes in bulk sections.

**Air Cylinder Seal Kit**
Plan for 2 - 3 seals in your parts inventory, depending on usage.

**Discharge Door Gasket**
Usually sold in bulk by the foot.
